

# GHOST-U

New configuration.  
Even more silent. Even more refined.  
With the same strength as always.

Larger,  
more powerful  
fan motor

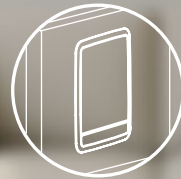

Further acoustic  
improvement,  
up to -17% noise  
emissions

New architecture,  
refined design  
down to the  
smallest detail

No visible controls,  
everything  
managed remotely

Recessed  
installation option  
available

Simplified installation,  
tilting front panel and  
optimized connector

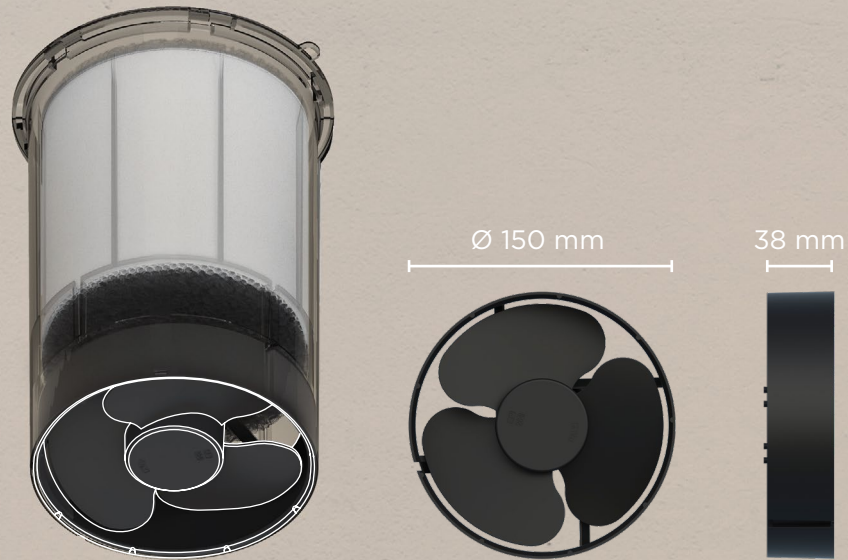

**GHOST-U**  
Standard installation

**GHOST-U IN**  
Built-in installation

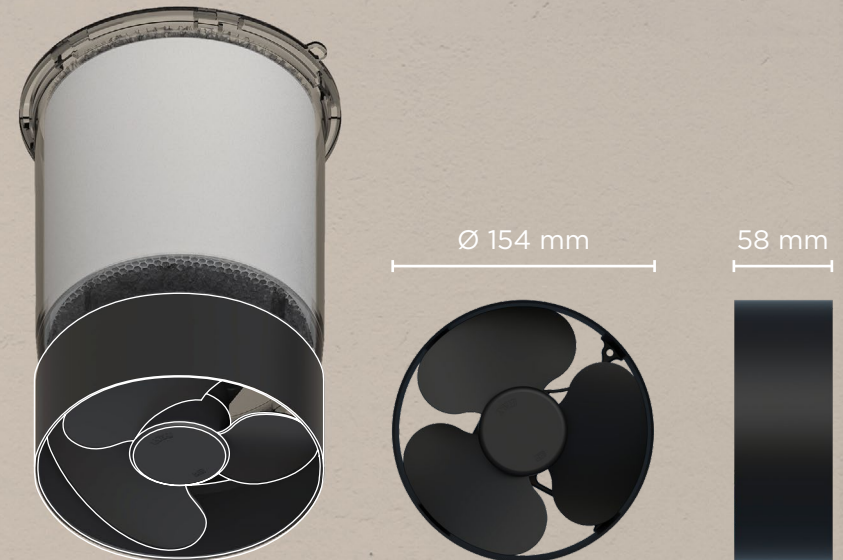

# GHOST

PREVIOUS CONFIGURATION

# GHOST-U

NEW CONFIGURATION

## New GHOST-U configuration advantages

### SPEED REDUCED BY 20%

at the same flow rate,  
20% RPM decrease.

### PERCEIVED NOISE REDUCED BY -17%

Sound pressure at maximum airflow  
drops from 30 dB(A)<sub>3m</sub> to  
25 dB(A)<sub>3m</sub> — a further improvement in  
acoustic comfort.

### LOWER ENERGY CONSUMPTION

At maximum airflow, consumption  
drops to 6.5W — less energy with  
the same performance.

## QUIETER THAN EVER

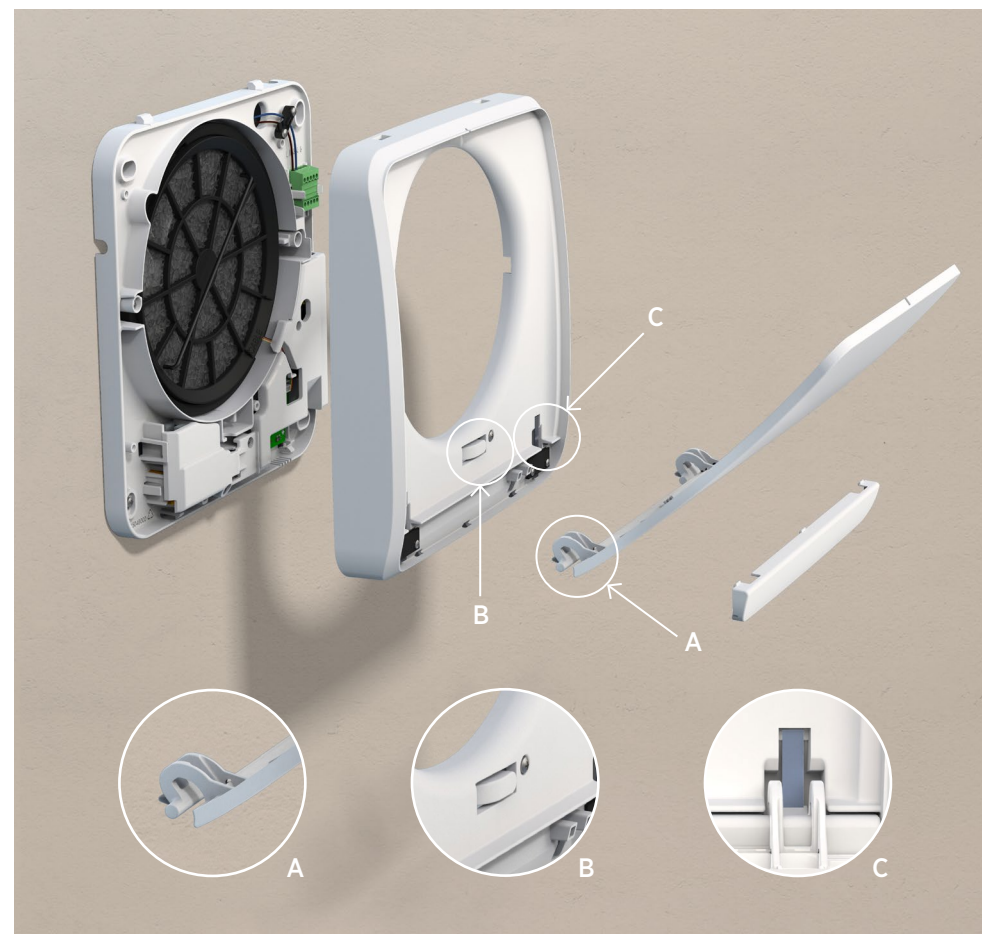

UP TO 17% NOISE REDUCTION COMPARED TO THE PREVIOUS VERSION.

The new fan motor delivers a noticeably quieter performance, ensuring perfect acoustic comfort — even in the most peaceful moments.

## ENHANCED TILTING FRONT PANEL SMOOTHER TO OPEN. BUILT TO LAST.

- (A) Reinforced arms
- (B) Redesigned cam for effortless movement
- (C) Upgraded tape spring for improved performance

## ESSENTIAL DESIGN

NO VISIBLE CONTROLS. EVERYTHING MANAGED REMOTELY.

ON/OFF button removed for an even cleaner look. Full control via remote or App.

## INTERNAL COVER

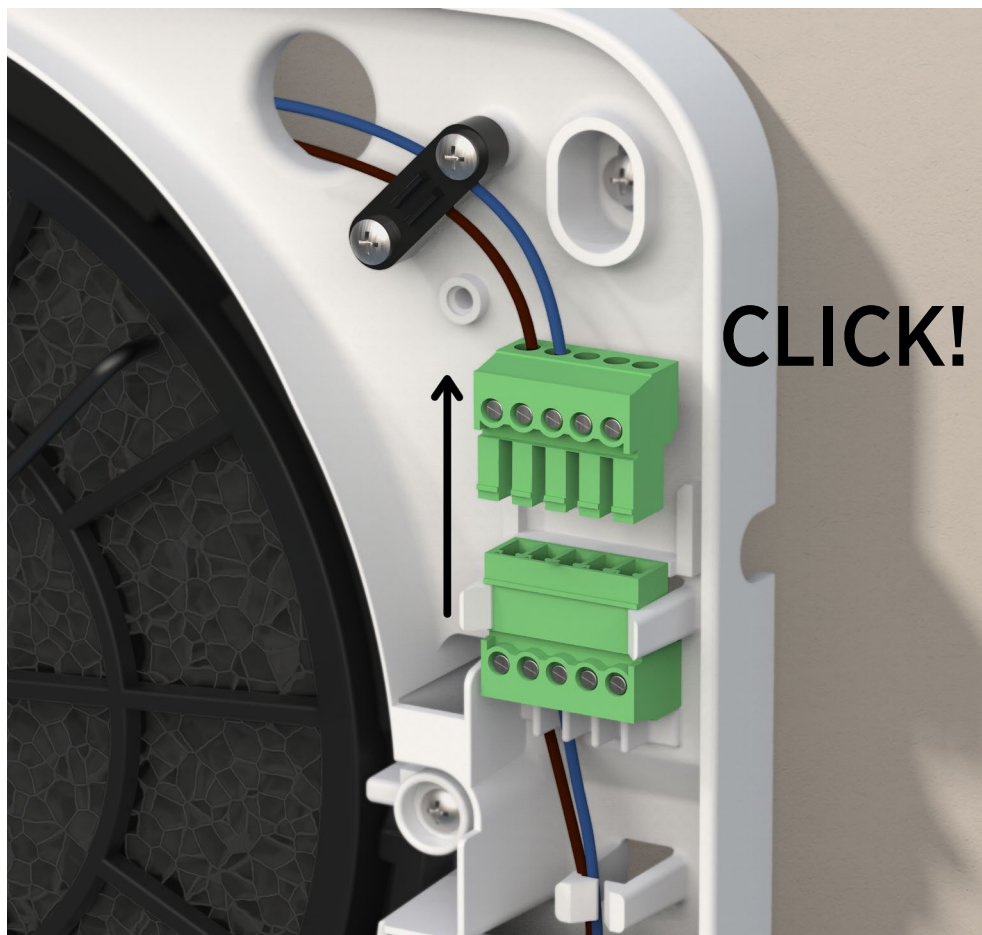

EVEN WHEN OPEN, EVERYTHING REMAINS HIDDEN.

The new internal cover conceals the components even during operation. Maximum discretion in any condition.

## QUICK-RELEASE CONNECTOR INSTANT CONNECTION.

The new quick-release connector speeds up installation by simplifying the electrical connection.

## NEW ARCHITECTURE EASIER TO ASSEMBLE. MAINTENANCE MADE SIMPLE.

The redesigned tilting front panel can be replaced in just a few steps — no complications.
